

# COLLISION REPAIR INFORMATION

## FOR THE TOYOTA DEALER

TITLE: ONE TON TRUCK WITH OR  
WITHOUT TOWING PACKAGE

PAGE 1 of 1

SECTION: GENERAL INFORMATION BULLETIN #3  
MODELS: 1985 TOYOTA ONE TON PICKUP TRUCKS  
DATE: FEBRUARY 1985

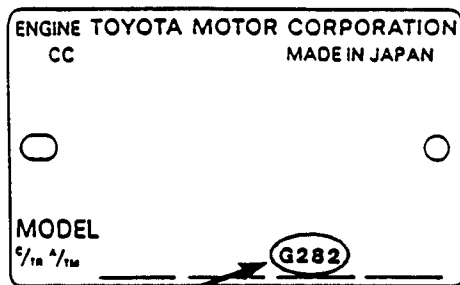

The purpose of this bulletin is to assist you in distinguishing the One Ton Truck with the towing package from the One Ton Truck without the towing package.

The One Ton Truck with the towing package is equipped with a 4.3 differential and a heavy duty radiator.

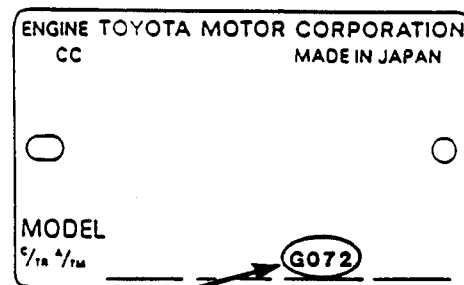

The One Ton Truck without the towing package is equipped with a 3.9 differential and a standard radiator.

There is no obvious visual difference between those components or the truck as a whole.

The only way to determine which truck you're dealing with is to look at the differential code on the name plate.

**4.3 Rear Axle Ratio:  
Towing Package**

**3.9 Rear Axle Ratio:  
Without Towing Package**

The Name Plate shown above which can be found on the front bulkhead under the engine hood contains the differential information necessary to distinguish the two trucks. Verify this information before writing a collision repair estimate or ordering parts.

### PART NUMBER INFORMATION

	<u>With Towing Package</u>	<u>Without Towing Package</u>
Radiator	16400-35220	16400-35200
Differential Carrier Assy	41110-35170	41110-25081
