

COLLISION REPAIR INFORMATION

FOR THE TOYOTA DEALER

TITLE: URETHANE-BASED REFINISH SYSTEMS
FOR TOYOTA VEHICLES

PAGE 1 of 1

SECTION: REFINISH BULLETIN #54

MODELS: ALL

DATE: MARCH 1994

Recent advances in factory paint technology provide high quality finishes which require up-to-date repair techniques. Toyota recommends **only urethane-based** refinish materials be used to restore the paint finish. Acrylic Lacquer-based refinish materials are **NOT RECOMMENDED**. Listed for your reference are some of the major U.S. suppliers of these materials and the appropriate paint system/product line.

PAINT MANUFACTURER	PRODUCT LINE
BASF	GLASURIT
DUPONT	CHROMA SYSTEM
HERBERTS	STANDOX
PPG	DELTRON/CONCEPT
SHERWIN-WILLIAMS	ULTRA BASE
SIKKENS	AUTO BASE/AUTO CLEAR LV
SPIES HECKER	PERMACRON

Additional information about Toyota paint finishes is available in the Toyota Fundamental Paint Procedures manual, part #00400-BR024.
